## We Create **Happy Aquariums...**

Here at AU Fishkeeping, we strive to educate the masses in the Midsouth on the care that goldfish actually need. We wish to give goldfish better homes and create more educated owners, so people can see how much goldfish can really thrive and grow. Most people believe goldfish only last a few months before they pass on when in reality goldfish can last many years under good care.

These beautiful creatures deserve to be in happy homes, and people deserve to know just how valuable and beautiful these fish can be. We also wish to create a resource in which people can come across high quality goldfish. Not only can goldfish breeders use our platform to sell any extra goldfish they desire to sell, but customers can grab quality goldfish without needing to order across the country. This creates less stress on the fish since they do not have to be shipped for days at a time to be received by a customer. Overall, we wish to provide better quality fishkeeping and happier environments for the goldfish in mind.

# Our Tanks

Our tanks are some of the best in the business, with sealed shatter proof glass sides, a reinforced bottom, and sleek design. These aquariums include a wooden base with storage, a glass top, and LED lighting to help your tank receive adequate light for your fish.

Currently our sizes range from 35 to 125 gallon tanks. We do not sell under 35 gallons due to the requirements needed to make goldfish happy. Learn more from our app on goldfish tank requirements.

# Our Food

\$15<sup>00</sup>

Our food is made with the highest quality ingredients to help your pets grow and develop healthy, bright colors. With our color sinking pellets, there is no worry of your fish developing swim bladder disease by ingesting too much air while they eat. Flavored with brine shrimp, your goldfish will enjoy the flavor as well.

We also throw in some veggie jello pellets for good measure, so your goldfish can enjoy a well rounded diet. These pellets give your goldfish the vegetable intake they need to live long and healthy lives.
